Who are we?

Hayati Health Centers are multi-disciplinary, family-inclusive clinics located in Dubai Healthcare City & Abu Dhabi (Ability Rehabilitation Center).

We provide the following services:

- Psychology & Counseling
- General Behavior Intervention Programs
- ABA Therapy
- Speech & Language Therapy
- Occupational Therapy
- Learning-support-assistance Services
- E-learning Support
- Vocational Training

Our treatments target functional communication, self-help, independent living skills, pre-academic readiness, and vocational productivity while supporting full community acceptance and inclusion.

What sets us apart from other healthcare facilities?

Innovative: We are the only center in the region to design and develop an interactive digital app to enhance our services to clients and their families:

The Hayati Health App.

Multidisciplinary: Our team believes in a holistic approach to treatment focusing not just on symptomatic treatment but working together for the overall growth and development of your child.

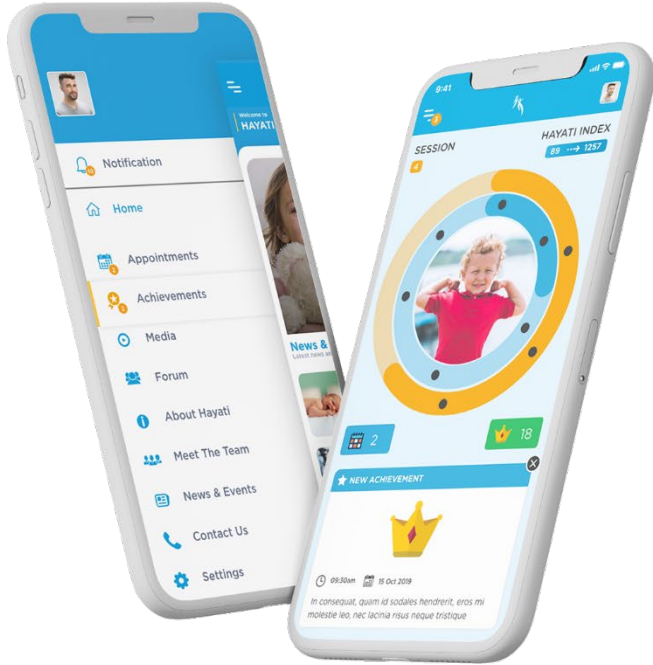

Child-focused: Structured approach to therapy - managed by Clinical Director/ BCBA/ Case Supervisors

Future thinking: Hayati paves way for a bright future for your child by giving them the tools and skills to find a job later in life through our vocational training services.

Integrative: Our goal is to prepare children for mainstream schools through therapy and inclusion initiatives.

At your fingertips

A unique digital data-tracking system used to assess progress and structure individualized treatment programs.

Hayati Health App links our therapists' work to a hand-held device:

- Comprehensive assessments
- Individualized treatment plan with digital data tracking
- Evidence-based practice focused on the client's needs
- Parent empowerment through data accessibility
- Facilitates in-depth reviews with parents to validate progress

The App provides interactive access to a child's therapeutic program, empowers parents and siblings, and allows a child to build upon clinic-based progress when back at home.
